

## Contents

### 1 Introduction

1.1. Motivations - why study speech tempo?	1
1.2. Aims and structure of the thesis	3

### 2 Sources of Tempo Variation

Introduction	5
2.1. Preliminary explanations	6
2.2. Extra-linguistic sources of tempo variation	9
Habitual speech rate	9
Age	10
Gender	11
Speech and hearing impairment	11
Auditory conditions	12
Cultural and geographical background	12
Language proficiency	13
2.3. Paralinguistic sources of tempo variation	15
Emotions	15
Stress	15
Competence and benevolence	16
Communication partner	16
2.4. Language-relevant sources of variation	17
Speech planning	17
Types of written and spoken texts	20
Dialogue management	21
Information management	22
Tempo variation on the axis of hyper- and hypospeech	23
Summary and discussion of chapter 2	23

### 3 Phonetic and Phonological Aspects of Tempo Variation

Introduction	25
3.1. Phrasing and pausing	25
Definition of pauses	27
Realising prosodic boundaries	28
Levels of pauses and levels of prosodic phrase boundaries	29
Placement of pauses and prosodic phrase boundaries	29
3.2. Intonation	30
3.3. Rhythm	31
3.4. Segmental processes	32

3.5. Segment and syllable durations	33
3.6. Articulatory organisation	38
Summary and discussion of chapter 3	38

## **4 Measuring Tempo**

Introduction	41
4.1. Categorisation of tempo	41
4.2. Units of tempo measurement	42
The word	43
The syllable	44
The sound segment	44
Intended vs. realised forms	45
Other units	45
Selecting a unit of tempo measurement	46
The role of pauses in tempo measurement	49
4.3. Dynamics of global and local tempo	50
Global and local levels of articulation rate	50
Domains of articulation rate	52
Normalisation of rate dynamics	53
Summary and discussion of chapter 4	54

## **5 Real-World Data Analysis: A Case Study**

Introduction	55
Prosody of horse race commentaries	55
Spontaneity of horse race commentaries	57
Purpose of this study	57
5.1. Methods	58
Material	58
Analysis	58
5.2. Results	60
Filled pauses	60
Duration of pauses and phrases	60
Global tempo	62
Fundamental frequency level	62
Fundamental frequency range	63
Fundamental frequency movements	64
Overall intensity	64
Spectral tilt	65
5.3. Discussion	66
Horse race commentaries characteristics	66
Prosody of excitement	66
Learned vs. natural excitement	68

Multiple functions of prosody	68
Summary and discussion of chapter 5	69

## **6 Production Experiment: Effects of Tempo on Phonological Structure**

Introduction	71
6.1. Production experiment 1	72
Methods	72
Results – Speaking and articulation rate	73
Results – Pausing	74
Results – Phrasing	75
Results – Segmental Reductions	77
Summary Production experiment 1	79
6.2. Production experiment 2	80
Methods	80
Results – Speaking and articulation rate	81
Results – Pausing	81
Results – Phrasing	82
Results – Pitch accents	83
Summary Production experiment 1	84
6.3. Discussion of production experiment 1 + 2	85
Pausing strategies	85
Phonological reorganisation	86
Individual strategy profiles	87
Summary and discussion of chapter 6	89

## **7 Tempo-Scaled Synthetic Speech**

Introduction	91
7.1 Approaches to non-linear tempo control	92
Attempts with synthetic speech	93
Attempts with non-synthetic speech	94
Conclusions	96
7.2 Prosodic phrasing in the "Mary" text-to-speech synthesiser	98
Default phrasing in "Mary"	99
7.3 Perception experiment 1	101
Methods	101
Results	103
Discussion	104
7.4 Perception experiment 2	105
Methods	105
Results	106
Discussion	107

Summary and discussion of chapter 7	108
<b>8 Summary and Conclusions</b>	
8.1 Summary	111
8.2. Conclusions	112
References	115
Appendix	129
