

# Automatic data processing with Praat

Deadline: 19.12.2007

## 4 Exercise

Reimplement solutions to the [last exercise sheet](#). Use `TableOfReal` objects to access interval times from the `TextGrids`, *direct object access*, and *include procedures* to streamline your development and make the code slimmer.

Don't forget to explain your code with *comments* and to *indent* loop and condition blocks for improved legibility.
